

201 stainless steel bars:Stainless steel bars, 201 stainless steel bars, 201 stainless steel bar, 201 stainless round bars, 201 stainless flat steel, 201 stainless hexagonal bar, 201 stainless steel black bars, 201 stainless square bar, 201 stainless capstan bar , 201 stainless steel bars of environmental protection, 201 stainless steel bright bars.

201 stainless steel bars has good corrosion resistance, heat resistance, low temperature strength and mechanical properties. Stamping , bending and other thermal processing is good, no hardening heat treatment.

201 stainless steel bars Chemical Composition:

Chemical Composition							
C	Mn	Si	Cr	Ni	S	P	N
≤0.15	5.5-7.5	≤0.75	16-18	3.5-5.5	≤0.03	≤0.06	≤0.25

201 stainless steel bars Mechanical Property :

Density (bs/cubic inch)	Elongation %	Modulus of elasticity (psi)
280l	55- 60	29,000,000

201 stainless steel bars are widely used in hardware, machinery, petroleum, chemicals, shipbuilding, marine engineering, boilers, heat exchangers, aerospace, environmental protection, high temperature, low temperature refrigeration, corrosion-resistant, automotive,

Bebon steel —— The most professional exporter on weathering resistant steel

Henan BEBON international co.,ltd

pharmaceutical, food, electricity, water, construction , urea fertilizer, nuclear power, new energy equipment, etc.

201 stainless steel bar, is new austenitic steel 300 series with Mn not Ni .With alkali, acid, high density, polished without bubbles characteristic, it makes high-quality materials to produce straps, back of the case, in some areas, 200 series stainless steel can replace the 304 series. The decay resistance of 200 series and 304 series stainless steel is in a great difference.
