4. Marking check

During the inspection, the inspector checked the marking of these steel pipes and found that each steel pipe was marked by spraying, which was consistent with standard ASTM A333 and ASTM A312. Here are some tagged photos:

5. Visual quality check

During the inspection, these steel tubes were inspected and no surface cracks, pits or other harmful defects not allowed by ASTM A333 and A312 were found. Below are some pictures of the surface of the steel tube:

6. Dimension check

During the inspection, the inspector sampled and measured the dimensions of these steel pipes. The details of these measurements are as follows.
